A SHORT NOTE...

At LWI, we take pride in considering our customers an integral part of our team. Our commitment is to deliver the ultimate customer service and an unparalleled cab interior purchasing experience. With over 20 years of industry expertise, we have honed our skills in producing top-quality interiors that consistently surpass customer expectations.

We take pleasure in working with an extensive range of materials, including laminates, metals, veneers, stones, glass, and more. This diverse selection empowers us to offer unmatched flexibility in interior design.

If you don't find your desired materials within our catalog, simply let us know – we are confident that we can source it for you.

From standard designs to custom creations, we are here to bring your visions to life.

With your trust and our expertise, we can optimize your cab interior standards while staying mindful of your budget. It is our mission to ensure your complete satisfaction throughout the entire process.

WE ARE SIMPLY

ECONOMICAL & PRACTICAL

Our elevator interiors can be personalized and updated at any time. Simply swap out one, two or more panels to update colors, materials, and designs.

FLEXIBLE & VERSATILE

Later down the road, the template design allows for easy exchange of panels in the case of damage or vandalism. Minimal measuring is required, simply match the number on the template with the number on the panel and hang it. The permanent template attaches to the cab shell with all reveals and clips pre-applied.

HIGH QUALITY & SAFETY

Our panels are E84 fire tested, as well as elevator code and LEED compliant. Our signature template system, along with superior materials, ensures our products can last for years.

WHAT WE OFFER!

LIGHTWEIGHT PANELS

A panel option uses an aluminum honeycomb core that is durable and light weight.

Available in almost all laminates and veneers that we offer.

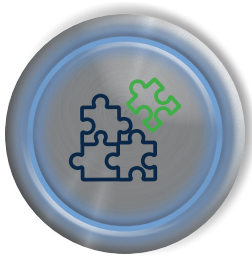

SUSTAINABILITY

Materials that contribute to LEED credits that helps in the buildings overall LEED certification.

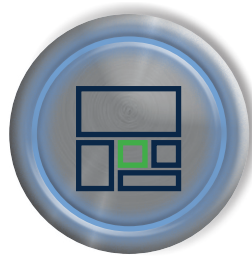

CODE COMPLIANCE

We offer finishes that meet or exceed the standards outlined in the ASTM E84 for passenger car enclosures.

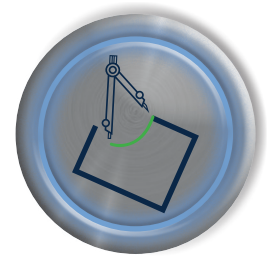

MATERIALS

A full range and an almost limitless selection of materials including plastic, laminate, stainless-steel, wood veneers, solid woods, solid surface, fabric, mirror and more.

EZ TEMPLATE

Our exclusive EZ template system comes with clips and reveals pre-attached, allowing for fast and easy installation.

RENDERINGS & SHOP DRAWINGS

We provide our customers with approval drawings and FREE renderings as a tool for confirming measurements and specifications prior to production.

INSTALLATION MADE E-Z...

Our EZ-Template system is designed with first-time installers in mind. It is easy, efficient and requires no special hardware or tools. Step-by-step instructions walk you through the installation process.
