

LWI ELEVATOR TALK

EXCELLENCE — MADE SIMPLE

CEILINGS, HANDRAILS, & BUMPERS

— Available Individually or as part of Any Interior

In this edition, we're highlighting one of the questions we hear most often: **Can I purchase your ceilings, handrails or bumpers separately?** The answer is YES. Every component we build — from our handrails and wall-protection bumpers to our full range of ceiling panels — is available as a stand-alone option or as part of a complete cab interior.

This is a four-page flyer for Elevator Talk (Edition 02). Inside, you'll find a closer look at ceiling and lighting options across the center spread, along with a full lineup of handrails and bumpers. Designed to outfit an entire cab, our components integrate seamlessly to elevate the overall cab experience.
